COVID-19
FREQUENTLY ASKED QUESTIONS

Due to the rapidly evolving nature of the situation, information below is subject to change. The Nevada Division of Public and Behavioral Health (DPBH) will be updating information as frequently as possible. For the most current information, visit https://www.cdc.gov/coronavirus/2019-ncov/index.html.
COVID-19

What is coronavirus?

The virus causing coronavirus disease 2019 (COVID-19) is not the same as the coronaviruses that commonly circulate among humans and cause mild illness, like the common cold. COVID-19 causes illnesses that can range from the mild to more severe.

What are the symptoms of COVID-19?

Symptoms can include:
- Fever
- Cough
- Shortness of breath, difficulty breathing

Symptoms may appear 2 - 14 days after exposure.

How does COVID-19 spread?

The viruses spread from an infected person to others through:
- the air by coughing and sneezing
- close personal contact, such as touching or shaking hands
- touching an object or surface with the virus on it, then touching your mouth, nose, or eyes

How severe is COVID-19?

Reported cases have ranged from mild illness (similar to a common cold) to severe pneumonia that requires hospitalization. So far, deaths have been reported mainly in older adults with prior health conditions.

What can I do to keep myself and others healthy?

- Wash your hands frequently with soap and water for at least 20 seconds.
- Avoid touching your face as much as possible.
- If you're feeling sick, stay home and avoid close contact with family members.
- Sneeze into your elbow instead of your hand.
