[Pre-Application](#) [top](#)

1. To qualify for this grant you must be a state, territory, local, or tribal government. Are you a state, territory, local, or tribal government?

Yes

No

2. Did you participate in the Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR) process? Answering No will not affect your ability to apply for FFY 2022 grant funds. Please ensure you send a representative to participate in the FFY 2021 THIRA process to be eligible for the FFY 2022 Homeland Security Grant Program funds.

Yes

No, However our agency/jurisdiction will send a representative this year to participate.

Yes

4. All funds granted under the Homeland Security Grant Program must focus on preventing terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. Does your application focus on this requirement? If it does not, your application is not eligible.

Yes

No

5. National Incident Management System (NIMS) implementation is required before allocating any federal preparedness awards in FFY 2022. Recipients must ensure and maintain the adoption and implementation of NIMS. Are you NIMS compliant?

Please reference the Notice of Funding Opportunity for FFY2021 as a guideline for NIMS compliance until the FFY2022 Notice of Funding Opportunity is released and will supersede.

Yes, we have formally adopted NIMS

No

No, but we will be compliant prior to receiving grant funds

6. In order for your application to be considered, you must attend open meetings to testify in front of either the Nevada Resilience Advisory Committee (NRAC) or Urban Area Working Group (UAWG) as well as Committee on Finance (COF) and the Nevada Commission on Homeland Security (NCHS). This is a requirement of the grant. If you do not send representation, your application will not be considered.

The NRAC Meeting will be held on 05/31/2022 :: The UAWG Meeting will be held on 05/26/2022 & 06/01/2022 :: Further Dates can be found in the Resource Documents in the FFY22 HSGP Timeline

Yes, I agree.

7. Did you participate in the Integrated Preparedness Plan Workshop (IPPW)?

Yes, my jurisdiction participated

No, my jurisdiction did not participate

8. All procurement is required to be compliant with Nevada Revised Statute 333 and/or Nevada Revised Statute 332. Per FEMA legal opinion, locals may not use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2CFR Part 200. All procurement must be free and open competition. Any sole source procurement must be pre-approved in writing by the DEM in advance of the procurement.

You may view the written legal opinion in the "Resource Document" tab.

Yes, I agree.

9. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, the Division of Emergency Management is unable to issue a grant. Sub-Grantees may not sub grant funds.

Yes, I understand.

[Application Questions](#) [top](#)

1. Name of the Homeland Security Grant Program (HSGP) funding stream you are requesting funding for:

State Homeland Security Program (SHSP)

Urban Area Security Initiative (UASI)

2. Name of Project

Name the project by the jurisdiction name and project intent.

Truckee Meadows Community College Physical Security

3. Classification - click the primary intention of the Proposed Project (NEW, MAINTAIN, or ENHANCE)

A list of the Strategic Programs is in the Nevada Homeland Security and Emergency Management Enterprise 2022 document in the resource documents section (Page 6).

- Project is NEW (No grant-funded projects have recently addressed this capability within the past five years; OR the project has not been funded in the past). YOUR PROJECT WILL BE COMPETITIVE
- Project will be MAINTAINED - Project is a FFY 22 Strategic Program and with minimal budget change
- Project is an ENHANCEMENT - Project is a FFY 22 Strategic Program with a significant budget change -YOUR PROJECT WILL BE COMPETITIVE

4. Please enter the name of the Strategic Program exactly as it appears on Page 6 of the Nevada Homeland Security and Emergency Management Enterprise 2022.

If your project is enhanced it will be considered competitive.

Planning efforts to maintain Continuity of Operations

5. Please choose one of the five mission areas or you may choose "All of the Above".

- Prevention. Prevent, avoid or stop an imminent, threatened or actual act of terrorism
- Protection. Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.
- Mitigation. Reduce the loss of life and property by lessening the impact of future disasters.
- Response. Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.
- Recovery. Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.
- All of the Above

6. Please select ONE main core capability for your project. If your project does not fit in this list choose not applicable and see question 7.

A description of Mission Areas and Core Capabilities can be found at: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

- Fatality Management Services
- Fire Management and Suppression
- Infrastructure Systems
- Logistics and Supply Chain Management
- Mass Care Services
- Mass Search and Rescue Operations
- On-Scene Security, Protection, and Law Enforcement
- Operational Communication
- Public Health, Healthcare, and Emergency Medical Services
- Health and Social Services
- Economic Recovery
- Natural and Cultural Resources
- Housing
- Not Applicable (choose from the second list)

7. If you selected not applicable on question 6, please select one main core capability from this list. Otherwise, select not applicable.

A description of Mission Areas and Core Capabilities: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

- Public Information and Warning
- Operational Coordination
- Forensics and Attribution
- Intelligence and Information Sharing
- Interdiction and Disruption
- Screening, Search and Detection
- Access Control and Identity Verification
- Physical Protective Measures
- Cybersecurity
- Supply Chain Integrity and Security
- Risk Management for Protection Programs and Activities
- Risk and Disaster Resilience Assessment
- Community Resilience
- Long-term Vulnerability Reduction
- Threats and Hazards Identification
- Environmental Response/Health and Safety
- Critical Transportation
- Situational Assessment
- Not Applicable

8. Please select the National Priority Area that your project applies to. If your project is not one of the 6 listed National Priority Areas, select "State Priority"

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

- Enhancing Community Preparedness and Resilience
- Enhancing the Protection of Soft Targets/Crowded Places
 - Enhancing Information Sharing and Intelligence Sharing and Analysis and cooperation with federal agencies including DHS
 - Combatting Domestic Violent Extremism
 - Enhancing Cyber Security
 - Enhancing Election Security
- State Priority

9. Please identify how much funding is allocated to the project to the National Priority?

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

100%

10. Describe how your project fits into the FFY 2022 National Priority or state strategic priorities. Please ensure your project falls under the listed core capability and lifelines.

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

The proposed target hardening activity will enhance protection of Truckee Meadows Community College, its assets, and all persons using TMCC facilities through the installation of a physical security access control and identity verification system.

11. Describe the investment or project, specifically how it addresses gaps and/or sustainment in the Threat and Hazard Identification Risk Assessment (THIRA)/Stakeholder Preparedness Review (SPR).

This question is specifically asked in the Investment Justification.

The project will address the Access Controls and Identity Verification and Physical Protective Measures capability targets in the 2021 THIRA by greatly enhancing physical protection of TMCC, its assets, and all persons using TMCC facilities by

active shooters, and wildfires as three threats of the greatest concern to the state. Improving access controls will allow tracking of lock access and the ability to lock down the facility more efficiently in the event of an active school shooter, reducing standardized impacts of the number of people affected and potential fatalities. Additionally, TMCC is available as an evacuation and emergency center in the event of terrorism, wildfire, or other extreme circumstance and was activated as an Incident Command Center for COVID-19 response. Providing new locks to TMCC will allow for reducing the following standardized impacts of the threat of COVID-19: people affected and potential fatalities. Allowing a secure location to isolate and/or receive medical care in the event of an emergency like the COVID-19 pandemic can reduce the impact of the threat by limiting the number of people affected from exposure or lack of medical treatment.

This project will address capability gaps in all POETE areas. A new system and procedures will be mapped and planned dependent on potential funding awarded, personnel will be hired to install the proper system, addressing any organization gap, and new equipment will be acquired for continued use and maintenance, addressing any equipment gap. Additionally, a capability gap is the need for training, as well as procedures for a new system. TMCC administration will undergo training from the selected vendor once a specific system is selected. They will then develop written procedures and protocol for the system, and provide ongoing training to TMCC staff, closing any training and exercises gaps in the SPR. TMCC is a vital part of NSHE and the northern Nevada community. Protecting all persons and property within these facilities, as well as maintaining a safe and secure evacuation location is critical to the area's safety, sustainability and economic health.

12. Please explain your project's nexus to terrorism.

TMCC is populated daily by members of our community, and is available as needed as an emergency location in the event of terrorism or other disaster. Increasing security and improving access control, allowing this location to serve as a safe and secure evacuation center would benefit the entire state of Nevada by serving as a resource and protecting our community. Most importantly, improving access controls and verification protects students, staff and other community members from the increased threat of active shooters on school campuses and other mass casualty attacks.

13. Project Outcome (Describe the goal of the Proposed Project in a summary statement). Describe the Proposed Project. Quantify the Capability. Identify the users and the beneficiaries of the capability. What will this project do for the entire State of Nevada? Identify the geographic location of the project (Specify County, Multiple Counties (List), Urban Area, or Statewide.)

The goal of the proposed project is to install access controls and an identity verification system for all TMCC facilities in order to improve physical security, keep people and assets safe, and to be a reliable emergency location for the area. The proposed target-hardening activity will address the capability of Access Controls and Identity Verification by installing a new access and identity control/verification key system for all Truckee Meadows Community College campus facilities. The system will use a form of key card electronic access allowing for the tracking of building access on a minimum of 300 access points. The system will provide the ability to allow and restrict access electronically, instead of changing physical locks and replacing standard keys, a slow and costly process. The users and beneficiaries of this project are the staff and students of this higher education institution, citizens of the surrounding community, and the state of Nevada as a whole. The campus is vital to the health of the community and is available as an evacuation and emergency center in the event of terrorism or extreme circumstance. This project aims to improve safety of campus occupants in the event of an active shooter or other threat. The campus is located in Reno, NV, the most populated northern Nevada city, and having it serve as a safe and secure community location/evacuation center would benefit the entire state of Nevada by serving as a resource for and/or protecting our community.

14. Project Implementation - Describe how, and by whom, the proposed project will be implemented. Describe the process by which the project will be accomplished. Identify who (i.e., staff, contract) will perform the work.

University Police Department, Northern Command will implement this project with the support of the administration of TMCC and with financial management and compliance review through the University of Nevada, Reno Office of Sponsored Projects. Police Services will work with the Business Center North purchasing department to complete the bidding process for this project and to ensure that all state laws and regulations are followed. Police Services will work closely with the chosen contractors to ensure the work is done according to grant specifications.

15. How much of this Investment in dollars will be obligated towards Law Enforcement Terrorism Prevention

of the five National Priority Areas identified above and any other investments.

For additional information, you may review: 6 USC 607 (a) 2 here: [https://uscode.house.gov/view.xhtml?req=\(title:6%20section:607%20edition:prelim\)](https://uscode.house.gov/view.xhtml?req=(title:6%20section:607%20edition:prelim))

\$1,992,000

16. Sustainment Plan: Identify any continuing financial obligation created by the Project, and proposed funding solution.

Once the locking system is in place, University Police Services will work with the administration of TMCC to ensure that the systems are maintained and repaired when necessary using state funds allocated to those facilities through a budgeting process.

17. Can this project funding request be reduced? Is it scalable? Please answer Yes or No, and explain below.

Yes, the project is scalable and can be completed in segments based on funding available. The line item budget is broken down by building. We can phase in a new lock system building by building. Total cost of this application is for the project as a whole.

18. Project Location: Provide the 5-digit zip code where the project will be executed. The project location could be distinct from the sub-recipient address.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

89512

19. Build or Sustain: Select "build" if this project focuses on starting a new capability or the intent of the project is to close a capability gap or "sustain" if the purpose of the project strictly maintains a core capability at its existing current level.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Build

Sustain

20. Is this request deployable? All assets supported in part or entirely with FFY 2022 HSGP funding must be readily deployable and NIMS-typed when possible to support emergency or disaster operations per existing Emergency Management Assistance Compact (EMAC) under 6 U.S.C. § 609, and any other applicable provision of the Homeland Security Act of 2002, as amended. Is the core capability supported by this project deployable to other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

21. Shareable: Is the core capability supported by this project shareable with other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

22. Does this project support a NIMS typed resource? If yes, continue to the next question. <p> To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

23. Enter the name of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Not applicable

24. Enter the ID of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not

Not applicable

25. Does this project require new construction, renovation, retrofitting, or modifications of an existing structure?

Please see slides 4 and 5 of EHP Screening Instructions in the "Resource Documents" tab. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

26. Does this project support a previously awarded project or investment? If yes, list up to three prior years' investments or projects, include the year, investment name, and the last milestone completed. The milestones are defined as Initiate, Plan, Execute, Control or Closeout.

Example: 2019, Recovery Framework, Control - 2020, Recovery Framework, Closeout - 2021 no project submitted. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No

27. FEMA/DHS requires grant-funded projects to be categorized under project management to have a beginning and end. Under this direction, please choose one of the following: Initiate, Plan, Execute, Control or Closeout. Most projects will fall under Initiate, however, several projects may be in phase 2 or phase 3 of multiyear projects.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

✓ Initiate - The authorization to begin work or resume work on any particular activity.

Plan - The purposes of establishing, at an early date, the parameters of the project that is going to be worked on as well as to try to delineate any specifics and/or any peculiarities to the project as a whole and/or any specific phases of the project.

Execute - The period within the project lifecycle during which the actual work of creating the project's deliverables is carried out.

Control - A mechanism which reacts to the current project status in order to ensure accomplishment of project objectives. This involves planning, measuring, monitoring, and taking corrective action based on the results of the monitoring.

Close Out - The completion of all work on a project. Can also refer to completion of a phase of the project.

28. Separate your budget into categories for the Standard form A- Budget Information for Non-Construction Programs (SF-424A)

	Personnel (Not Contractors) Amount
	Personnel Fringe Benefits (Not Contractors) Amount
	Travel Amount
1,992,000	Equipment Amount (over \$5,000)
	Supplies Amount
	Contractual Amount
	Construction Amount
	Other Amount
1,992,000.00	TOTAL

Category Budget Totals [top](#)

Funding Sources/Revenues	Personnel & Fringe	Travel	Planning	Organization	Equipment
Access Control and Identity Verification System					\$ 1,992,000.00
Total	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00	\$ 1,992,000.00

Pre-Application [top](#)

1. To qualify for this grant you must be a state, territory, local, or tribal government. Are you a state, territory, local, or tribal government?

Yes

No

2. Did you participate in the Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR) process? Answering No will not affect your ability to apply for FFY 2022 grant funds. Please ensure you send a representative to participate in the FFY 2021 THIRA process to be eligible for the FFY 2022 Homeland Security Grant Program funds.

Yes

No. However our agency/jurisdiction will send a representative this year to participate

3. Did you activate your emergency operation center for COVID-19 response and recovery and/or hold a tabletop exercise in the calendar year 2021 or 2022?

Yes

4. All funds granted under the Homeland Security Grant Program must focus on preventing terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. Does your application focus on this requirement? If it does not, your application is not eligible.

Yes

No

5. National Incident Management System (NIMS) implementation is required before allocating any federal preparedness awards in FFY 2022. Recipients must ensure and maintain the adoption and implementation of NIMS. Are you NIMS compliant?

Please reference the Notice of Funding Opportunity for FFY2021 as a guideline for NIMS compliance until the FFY2022 Notice of Funding Opportunity is released and will supersede.

Yes, we have formally adopted NIMS

No

No, but we will be compliant prior to receiving grant funds

6. In order for your application to be considered, you must attend open meetings to testify in front of either the Nevada Resilience Advisory Committee (NRAC) or Urban Area Working Group (UAWG) as well as Committee on Finance (COF) and the Nevada Commission on Homeland Security (NCHS). This is a requirement of the grant. If you do not send representation, your application will not be considered.

The NRAC Meeting will be held on 05/31/2022 :: The UAWG Meeting will be held on 05/26/2022 & 06/01/2022 :: Further Dates can be found in the Resource Documents in the FFY22 HSGP Timeline

Yes, I agree.

7. Did you participate in the Integrated Preparedness Plan Workshop (IPPW)?

Yes, my jurisdiction participated

No, my jurisdiction did not participate

8. All procurement is required to be compliant with Nevada Revised Statute 333 and/or Nevada Revised Statute 332. Per FEMA legal opinion, locals may not use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2CFR Part 200. All procurement must be free and open competition. Any sole source procurement must be pre-approved in writing by the DEM in advance of the procurement.

You may view the written legal opinion in the "Resource Document" tab.

Yes, I agree.

9. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, the Division of Emergency Management is unable to issue a grant. Sub-Grantees may not sub grant funds.

Yes, I understand.

Application Questions [top](#)

1. Name of the Homeland Security Grant Program (HSGP) funding stream you are requesting funding for:

State Homeland Security Program (SHSP)

Urban Area Security Initiative (UASI)

2. Name of Project

3. Classification - click the primary intention of the Proposed Project (NEW, MAINTAIN, or ENHANCE)

A list of the Strategic Programs is in the Nevada Homeland Security and Emergency Management Enterprise 2022 document in the resource documents section (Page 6).

- Project is NEW (No grant-funded projects have recently addressed this capability within the past five years; OR the project has not been funded in the past). YOUR PROJECT WILL BE COMPETITIVE
 - Project will be MAINTAINED - Project is a FFY 22 Strategic Program and with minimal budget change
 - Project is an ENHANCEMENT - Project is a FFY 22 Strategic Program with a significant budget change -YOUR PROJECT WILL BE COMPETITIVE

4. Please enter the name of the Strategic Program exactly as it appears on Page 6 of the Nevada Homeland Security and Emergency Management Enterprise 2022.

If your project is enhanced it will be considered competitive.

Planning Efforts to maintain Community Resilience and Mass Fatality.

5. Please choose one of the five mission areas or you may choose "All of the Above".

Prevention. Prevent, avoid or stop an imminent, threatened or actual act of terrorism

- Protection. Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.

Mitigation. Reduce the loss of life and property by lessening the impact of future disasters.

Response. Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.

Recovery. Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

All of the Above

6. Please select ONE main core capability for your project. If your project does not fit in this list choose not applicable and see question 7.

A description of Mission Areas and Core Capabilities can be found at: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

Fatality Management Services

Fire Management and Suppression

Infrastructure Systems

Logistics and Supply Chain Management

Mass Care Services

Mass Search and Rescue Operations

- On-Scene Security, Protection, and Law Enforcement

Operational Communication

Public Health, Healthcare, and Emergency Medical Services

Health and Social Services

Economic Recovery

Natural and Cultural Resources

Housing

Not Applicable (choose from the second list)

7. If you selected not applicable on question 6, please select one main core capability from this list. Otherwise, select not applicable.

preparedness/mission-core-capabilities

- Planning
- Public Information and Warning
- Operational Coordination
- Forensics and Attribution
- Intelligence and Information Sharing
- Interdiction and Disruption
- Screening, Search and Detection
- Access Control and Identity Verification
- Physical Protective Measures

- Supply Chain Integrity and Security
- Risk Management for Protection Programs and Activities
- Risk and Disaster Resilience Assessment
- Community Resilience
- Long-term Vulnerability Reduction
- Threats and Hazards Identification
- Environmental Response/Health and Safety
- Critical Transportation
- Situational Assessment
- Not Applicable

8. Please select the National Priority Area that your project applies to. If your project is not one of the 6 listed National Priority Areas, select "State Priority"

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

- Enhancing Community Preparedness and Resilience
 - Enhancing the Protection of Soft Targets/Crowded Places
 - Enhancing Information Sharing and Intelligence Sharing and Analysis and cooperation with federal agencies including DHS
 - Combatting Domestic Violent Extremism
 - Enhancing Cyber Security
 - Enhancing Election Security
 - State Priority

9. Please identify how much funding is allocated to the project to the National Priority?

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

30746

10. Describe how your project fits into the FFY 2022 National Priority or state strategic priorities. Please ensure your project falls under the listed core capability and lifelines.

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

This project will enhance community preparedness and resilience by improving transparency between law enforcement and community members, providing opportunity to de-escalate threatening situations by the presence of a recording device on law enforcement and our community service officers. Should a harmful event occur, RapidStop tourniquets would allow officers to respond and save lives when time is critical to an injury. Transparency between law enforcement and the community builds trust and increases community resilience when events occur. These are measure to improve on-scene protection and law enforcement to prevent threats and preserve lives in the event of an attack.

Hazard Identification Risk Assessment (THIRA)/Stakeholder Preparedness Review (SPR).

This question is specifically asked in the Investment Justification.

This project aims to improve officer and community safety by equipping police officers with up-to-date body worn cameras and life saving tourniquets. Active shooters and mass casualty attacks are listed in the 2021 THIRA as two of the largest threats to the region. This project can help close the gap on public health and emergency healthcare through use of law enforcement employed tourniquets following a mass casualty attack. Body worn cameras protect the community and officers from active threats by incorporating an objective, evidence collecting device that can help de-escalate a high stress situation, as well as through improving community trust and transparency.

12. Please explain your project's nexus to terrorism.

This project allows our agency to prevent, protect, mitigate and respond to acts of terrorism and other threats in a way that potentially keeps officers safer and community members safer. The materials requested help to de-escalate potentially violent confrontations, provide objective evidence, and provide life saving healthcare that all relate to terrorism and other threats. With the increase in school shootings in recent years, preparing our officers for any threat is critical to the safety of our campuses and surrounding communities.

13. Project Outcome (Describe the goal of the Proposed Project in a summary statement). Describe the Proposed Project. Quantify the Capability. Identify the users and the beneficiaries of the capability. What will this project do for the entire State of Nevada? Identify the geographic location of the project (Specify County, Multiple Counties (List), Urban Area, or Statewide.)

The proposed prevention and response project is the acquisition of body worn cameras and tourniquets to de-escalate threatening situations and to respond to attacks and personal injury. Our police officers and community service officers will use body worn cameras to keep our agency and community members safer by continuing a transparent and trusting relationship with our community, and by collecting an objective account of any situation. Tourniquets will be used by our officers on any person in need of emergency help where a tourniquet could be of use. This project will benefit the state by creating safer and better prepared higher education institutions in the northern part of the state. The geographic location for this project is the jurisdiction covered by University Police Department, Northern Command, which spreads across all of Northern Nevada.

14. Project Implementation - Describe how, and by whom, the proposed project will be implemented. Describe the process by which the project will be accomplished. Identify who (i.e., staff, contract) will perform the work.

University Police Department, Northern Command will implement this project along with the financial management and compliance review through the University of Nevada, Reno Office of Sponsored Projects. Police Services will work with the Business Center North purchasing department to complete any purchases for this project and to ensure that all state laws and regulations are followed. Police Services will work closely with chosen contractors to ensure the work is done according to grant specifications.

15. How much of this Investment in dollars will be obligated towards Law Enforcement Terrorism Prevention Activities (LETPA) Under 6 U.S.C. § 607, The LETPA allocation may be met by funding projects in any combination of the five National Priority Areas identified above and any other investments.

For additional information, you may review: 6 USC 607 (a) 2 here: [https://uscode.house.gov/view.xhtml?req=\(title:6%20section:607%20edition:prelim\)](https://uscode.house.gov/view.xhtml?req=(title:6%20section:607%20edition:prelim))

30746

16. Sustainment Plan: Identify any continuing financial obligation created by the Project, and proposed funding solution.

Body worn cameras have continued financial obligation for data storage, and camera and part replacement and repair. Our agency budgets to cover these costs once the grant funds are expended and to maintain the cameras moving forward as it is a critical piece of officer uniform.

17. Can this project funding request be reduced? Is it scaleable? Please answer Yes or No, and explain below.

Yes, this project is scaleable. If not all funding can be awarded, our agency will prioritize which parts of the proposal are most necessary.

18. Project Location: Provide the 5-digit zip code where the project will be executed. The project location could be distinct from the sub-recipient address.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

19. Build or Sustain: Select "build" if this project focuses on starting a new capability or the intent of the project is to close a capability gap or "sustain" if the purpose of the project strictly maintains a core capability at its existing current level.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Build
- Sustain

20. Is this request deployable? All assets supported in part or entirely with FFY 2022 HSGP funding must be readily deployable and NIMS-typed when possible to support emergency or disaster operations per existing Emergency Management Assistance Compact (EMAC) under 6 U.S.C. § 609, and any other applicable provision of the Homeland Security Act of 2002, as amended. Is the core capability supported by this project deployable to other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Yes
- No

21. Shareable: Is the core capability supported by this project shareable with other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Yes
- No

22. Does this project support a NIMS typed resource? If yes, continue to the next question.<p> To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Yes
- No

23. Enter the name of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Not applicable

24. Enter the ID of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Not applicable

25. Does this project require new construction, renovation, retrofitting, or modifications of an existing structure?

Please see slides 4 and 5 of EHP Screening Instructions in the "Resource Documents" tab. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No

26. Does this project support a previously awarded project or investment? If yes, list up to three prior years' investments or projects, include the year, investment name, and the last milestone completed. The milestones are defined as Initiate, Plan, Execute, Control or Closeout.

Example: 2019, Recovery Framework, Control - 2020, Recovery Framework, Closeout - 2021 no project submitted. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No.

27. FEMA/DHS requires grant-funded projects to be categorized under project management to have a beginning and end. Under this direction, please choose one of the following: Initiate, Plan, Execute, Control or Closeout. Most projects will fall under Initiate, however, several projects may be in phase 2 or phase 3 of multiyear

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

✓ Initiate - The authorization to begin work or resume work on any particular activity.

Plan - The purposes of establishing, at an early date, the parameters of the project that is going to be worked on as well as to try to delineate any specifics and/or any peculiarities to the project as a whole and/or any specific phases of the project.

Execute - The period within the project lifecycle during which the actual work of creating the project's deliverables is carried out.

Control - A mechanism which reacts to the current project status in order to ensure accomplishment of project objectives. This involves planning, measuring, monitoring, and taking corrective action based on the results of the monitoring.

Close Out - The completion of all work on a project. Can also refer to completion of a phase of the project.

28. Separate your budget into categories for the Standard form A- Budget Information for Non-Construction Programs (SF-424A)

	Personnel (Not Contractors) Amount
	Personnel Fringe Benefits (Not Contractors) Amount
	Travel Amount
	Equipment Amount (over \$5,000)
23470	Supplies Amount
	Contractual Amount
	Construction Amount
7275.7	Other Amount
30,745.70	TOTAL

Category Budget Totals [top](#)

Funding Sources/Revenues	<u>Personnel & Fringe</u>	<u>Travel</u>	<u>Planning</u>	<u>Organization</u>	<u>Equipment</u>
Body Cameras			\$ 0.00	\$ 20,970.00	
Tourniquets			\$ 0.00	\$ 2,500.00	
Indirect Costs			\$ 0.00	\$ 7,276.00	\$ 0.00
			\$ 0.00	\$ 0.00	\$ 0.00
Total	\$ 0.00	\$ 0.00	\$ 0.00	\$ 30,746.00	\$ 0.00

Funding Uses/Expenses

Category Total from the Line Item Detail Tab

Total

Training Exercise

\$ 0.00 **\$ 0.00**

Category Budget Totals Narrative

The planning category includes all material requests that do not fall into the equipment category. We are requesting 30 Body Cameras at \$699 each and 50 RapidStop Tourniquets at \$50 each. The University of Nevada has a federally negotiated indirect cost rate charged at 31% of MTDC.

[Pre-Application](#) [top](#)

1. To qualify for this grant you must be a state, territory, local, or tribal government. Are you a state, territory, local, or tribal government?

Yes

No

2. Did you participate in the Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR) process? Answering No will not affect your ability to apply for FFY 2022 grant funds. Please ensure you send a representative to participate in the FFY 2021 THIRA process to be eligible for the FFY 2022 Homeland Security Grant Program funds.

Yes

No, However our agency/jurisdiction will send a representative this year to participate.

Yes

4. All funds granted under the Homeland Security Grant Program must focus on preventing terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. Does your application focus on this requirement? If it does not, your application is not eligible.

Yes

No

5. National Incident Management System (NIMS) implementation is required before allocating any federal preparedness awards in FFY 2022. Recipients must ensure and maintain the adoption and implementation of NIMS. Are you NIMS compliant?

Please reference the Notice of Funding Opportunity for FFY2021 as a guideline for NIMS compliance until the FFY2022 Notice of Funding Opportunity is released and will supersede.

Yes, we have formally adopted NIMS

No

No, but we will be compliant prior to receiving grant funds

6. In order for your application to be considered, you must attend open meetings to testify in front of either the Nevada Resilience Advisory Committee (NRAC) or Urban Area Working Group (UAWG) as well as Committee on Finance (COF) and the Nevada Commission on Homeland Security (NCHS). This is a requirement of the grant. If you do not send representation, your application will not be considered.

The NRAC Meeting will be held on 05/31/2022 :: The UAWG Meeting will be held on 05/26/2022 & 06/01/2022 :: Further Dates can be found in the Resource Documents in the FFY22 HSGP Timeline

Yes, I agree.

7. Did you participate in the Integrated Preparedness Plan Workshop (IPPW)?

Yes, my jurisdiction participated

No, my jurisdiction did not participate

8. All procurement is required to be compliant with Nevada Revised Statute 333 and/or Nevada Revised Statute 332. Per FEMA legal opinion, locals may not use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2CFR Part 200. All procurement must be free and open competition. Any sole source procurement must be pre-approved in writing by the DEM in advance of the procurement.

You may view the written legal opinion in the "Resource Document" tab.

Yes, I agree.

9. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, the Division of Emergency Management is unable to issue a grant. Sub-Grantees may not sub grant funds.

Yes, I understand.

Application Questions [top](#)

1. Name of the Homeland Security Grant Program (HSGP) funding stream you are requesting funding for:

State Homeland Security Program (SHSP)

Urban Area Security Initiative (UASI)

2. Name of Project

Name the project by the jurisdiction name and project intent.

UPDNC Training System

3. Classification - click the primary intention of the Proposed Project (NEW, MAINTAIN, or ENHANCE)

A list of the Strategic Programs is in the Nevada Homeland Security and Emergency Management Enterprise 2022 document in the resource documents section (Page 6).

- Project is NEW (No grant-funded projects have recently addressed this capability within the past five years; OR the project has not been funded in the past). YOUR PROJECT WILL BE COMPETITIVE
- Project will be MAINTAINED - Project is a FFY 22 Strategic Program and with minimal budget change
- Project is an ENHANCEMENT - Project is a FFY 22 Strategic Program with a significant budget change -YOUR PROJECT WILL BE COMPETITIVE

4. Please enter the name of the Strategic Program exactly as it appears on Page 6 of the Nevada Homeland Security and Emergency Management Enterprise 2022.

If your project is enhanced it will be considered competitive.

Planning efforts to maintain Mass Fatality

5. Please choose one of the five mission areas or you may choose "All of the Above".

- Prevention. Prevent, avoid or stop an imminent, threatened or actual act of terrorism
- Protection. Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.
- Mitigation. Reduce the loss of life and property by lessening the impact of future disasters.
- Response. Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.
- Recovery. Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.
- All of the Above

6. Please select ONE main core capability for your project. If your project does not fit in this list choose not applicable and see question 7.

A description of Mission Areas and Core Capabilities can be found at: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

- Fatality Management Services
- Fire Management and Suppression
- Infrastructure Systems
- Logistics and Supply Chain Management
- Mass Care Services
- Mass Search and Rescue Operations
- On-Scene Security, Protection, and Law Enforcement
- Operational Communication
- Public Health, Healthcare, and Emergency Medical Services
- Health and Social Services
- Economic Recovery
- Natural and Cultural Resources
- Housing
- Not Applicable (choose from the second list)

7. If you selected not applicable on question 6, please select one main core capability from this list. Otherwise, select not applicable.

A description of Mission Areas and Core Capabilities: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

- Public Information and Warning
- Operational Coordination
- Forensics and Attribution
- Intelligence and Information Sharing
- Interdiction and Disruption
- Screening, Search and Detection
- Access Control and Identity Verification
- Physical Protective Measures
- Cybersecurity
- Supply Chain Integrity and Security
- Risk Management for Protection Programs and Activities
- Risk and Disaster Resilience Assessment
- Community Resilience
- Long-term Vulnerability Reduction
- Threats and Hazards Identification
- Environmental Response/Health and Safety
- Critical Transportation
- Situational Assessment
- Not Applicable

8. Please select the National Priority Area that your project applies to. If your project is not one of the 6 listed National Priority Areas, select "State Priority"

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

- Enhancing Community Preparedness and Resilience
- Enhancing the Protection of Soft Targets/Crowded Places
 - Enhancing Information Sharing and Intelligence Sharing and Analysis and cooperation with federal agencies including DHS
 - Combatting Domestic Violent Extremism
 - Enhancing Cyber Security
 - Enhancing Election Security
 - State Priority

9. Please identify how much funding is allocated to the project to the National Priority?

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

\$160,000

10. Describe how your project fits into the FFY 2022 National Priority or state strategic priorities. Please ensure your project falls under the listed core capability and lifelines.

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

This project aims to improve protection of soft targets/crowded places by improving training for local law enforcement to better equip them for active shooters, acts terrorisms and other threats to our campuses. With 6 higher education institutions in our jurisdiction, and with the constant threat of active shooters on school campuses, ensuring that our officers are best equipped to respond to threats is critical to our community's safety.

11. Describe the investment or project, specifically how it addresses gaps and/or sustainment in the Threat and Hazard Identification Risk Assessment (THIRA)/Stakeholder Preparedness Review (SPR).

This question is specifically asked in the Investment Justification.

The 2021 THIRA lists active shooters as one of the biggest threats to our region, along with mass casualty attacks. Our

shooters at places of large gatherings are a nationwide threat today. This project aims to improve physical protective measures through preparation and training of law enforcement officers in the region for the many threatening scenarios that they may encounter. Increasing their exposure and experience with terrorism scenarios, active shooter scenarios, and many other threats through an adaptable and realistic method of training will better prepare officers to protect our communities and keep people safe. The project would fund a simulation training system than required less personnel resources and more realistic and varying scenarios than are currently available in our agency.

12. Please explain your project's nexus to terrorism.

This project aims to better prepare law enforcement officers to respond to acts of terrorism, active shooters, and other threats to our campus communities through improved and varied training scenarios. This preparation project directly ties to training for response to acts of terrorism so that our law enforcement officers are ready for any threat.

13. Project Outcome (Describe the goal of the Proposed Project in a summary statement). Describe the Proposed Project. Quantify the Capability. Identify the users and the beneficiaries of the capability. What will this project do for the entire State of Nevada? Identify the geographic location of the project (Specify County, Multiple Counties (List), Urban Area, or Statewide.)

This project aims to better prepare law enforcement officers to respond to acts of terrorism, active shooters, and other threats to our campus communities through improved and varied training scenarios. The core capability that this project addresses is On-Scene Security, Protection, and Law Enforcement. Through simulation training, officers can practice responding to real life scenarios, gain insights and review analytics to improve their real life on scene security and protection of our communities. Our officers, community service officers and some community members will use the training system. This project will benefit the state of Nevada as a whole by preparing officers to prevent and respond to threats. University Police Department, Northern Command has campuses and facilities across Nevada, creating a jurisdiction that spans the state. Training our officers means their expertise is working to keep the entire state as safe as possible. The focus of this project is statewide with a focus on Northern Nevada.

14. Project Implementation - Describe how, and by whom, the proposed project will be implemented. Describe the process by which the project will be accomplished. Identify who (i.e., staff, contract) will perform the work.

University Police Services will implement this project with the support of the financial management and compliance review through the University of Nevada, Reno Office of Sponsored Projects. Police Services will work with the Business Center North purchasing department to complete the bidding process for this project and to ensure that all state laws and regulations are followed. Police Services will work closely with the chosen contractors to ensure the work is done according to grant specifications. Once in place University Police will ensure the systems are well maintained and located where they are most efficiently used across the state.

15. How much of this Investment in dollars will be obligated towards Law Enforcement Terrorism Prevention Activities (LETPA) Under 6 U.S.C. § 607, The LETPA allocation may be met by funding projects in any combination of the five National Priority Areas identified above and any other investments.

For additional information, you may review: 6 USC 607 (a) 2 here: [https://uscode.house.gov/view.xhtml?req=\(title:6%20section:607%20edition:prelim\)160000](https://uscode.house.gov/view.xhtml?req=(title:6%20section:607%20edition:prelim)160000)

16. Sustainment Plan: Identify any continuing financial obligation created by the Project, and proposed funding solution.

Once the training system is installed and functioning, general maintenance costs are anticipated, as well as costs to maintain an up to date and expansive training library. Our agency will incorporate these ongoing costs into the annual budget to maintain top quality training opportunities for officers.

17. Can this project funding request be reduced? Is it scaleable? Please answer Yes or No, and explain below.

Yes, the project can be reduced to purchase one system at a time if necessary, though it could raise cost per system.

18. Project Location: Provide the 5-digit zip code where the project will be executed. The project location could be distinct from the sub-recipient address.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)
89557

19. Build or Sustain: Select "build" if this project focuses on starting a new capability or the intent of the project

existing current level.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Build
- Sustain

20. Is this request deployable? All assets supported in part or entirely with FFY 2022 HSGP funding must be readily deployable and NIMS-typed when possible to support emergency or disaster operations per existing Emergency Management Assistance Compact (EMAC) under 6 U.S.C. § 609, and any other applicable provision of the Homeland Security Act of 2002, as amended. Is the core capability supported by this project deployable to other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Yes
- No

21. Shareable: Is the core capability supported by this project shareable with other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Yes
- No

22. Does this project support a NIMS typed resource? If yes, continue to the next question.<p> To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Yes
- No

23. Enter the name of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Not applicable

24. Enter the ID of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Not applicable

25. Does this project require new construction, renovation, retrofitting, or modifications of an existing structure?

Please see slides 4 and 5 of EHP Screening Instructions in the "Resource Documents" tab. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No

26. Does this project support a previously awarded project or investment? If yes, list up to three prior years' investments or projects, Include the year, investment name, and the last milestone completed. The milestones are defined as Initiate, Plan, Execute, Control or Closeout.

Example: 2019, Recovery Framework, Control - 2020, Recovery Framework, Closeout - 2021 no project submitted. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No

27. FEMA/DHS requires grant-funded projects to be categorized under project management to have a beginning and end. Under this direction, please choose one of the following: Initiate, Plan, Execute, Control or Closeout. Most projects will fall under Initiate, however, several projects may be in phase 2 or phase 3 of multiyear projects.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- Initiate - The authorization to begin work or resume work on any particular activity.

well as to try to delineate any specifics and/or any peculiarities to the project as a whole and/or any specific phases of the project.

Execute - The period within the project lifecycle during which the actual work of creating the project's deliverables is carried out.

Control - A mechanism which reacts to the current project status in order to ensure accomplishment of project objectives. This involves planning, measuring, monitoring, and taking corrective action based on the results of the monitoring.

Close Out - The completion of all work on a project. Can also refer to completion of a phase of the project.

28. Separate your budget into categories for the Standard form A- Budget Information for Non-Construction Programs (SF-424A)

Pre-Application [top](#)

1. To qualify for this grant you must be a state, territory, local, or tribal government. Are you a state, territory, local, or tribal government?

Yes

No

2. Did you participate in the Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR) process? Answering No will not affect your ability to apply for FFY 2022 grant funds. Please ensure you send a representative to participate in the FFY 2021 THIRA process to be eligible for the FFY 2022 Homeland Security Grant Program funds.

Yes

No, However our agency/jurisdiction will send a representative this year to participate.

3. Did you activate your emergency operation center for COVID-19 response and recovery and/or hold a

Yes. The city conducted several table top exercises and maintained an emergency operations center for COVID related issues.

4. All funds granted under the Homeland Security Grant Program must focus on preventing terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. Does your application focus on this requirement? If it does not, your application is not eligible.

Yes

No

5. National Incident Management System (NIMS) implementation is required before allocating any federal preparedness awards in FFY 2022. Recipients must ensure and maintain the adoption and implementation of NIMS. Are you NIMS compliant?

Please reference the Notice of Funding Opportunity for FFY2021 as a guideline for NIMS compliance until the FFY2022 Notice of Funding Opportunity is released and will supersede.

Yes, we have formally adopted NIMS

No

No, but we will be compliant prior to receiving grant funds

6. In order for your application to be considered, you must attend open meetings to testify in front of either the Nevada Resilience Advisory Committee (NRAC) or Urban Area Working Group (UAWG) as well as Committee on Finance (COF) and the Nevada Commission on Homeland Security (NCHS). This is a requirement of the grant. If you do not send representation, your application will not be considered.

The NRAC Meeting will be held on 05/31/2022 :: The UAWG Meeting will be held on 05/26/2022 & 06/01/2022 :: Further Dates can be found in the Resource Documents in the FFY22 HSGP Timeline

Yes, I agree.

7. Did you participate in the Integrated Preparedness Plan Workshop (IPPW)?

Yes, my jurisdiction participated

No, my jurisdiction did not participate

8. All procurement is required to be compliant with Nevada Revised Statute 333 and/or Nevada Revised Statute 332. Per FEMA legal opinion, locals may not use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2CFR Part 200. All procurement must be free and open competition. Any sole source procurement must be pre-approved in writing by the DEM in advance of the procurement.

You may view the written legal opinion in the "Resource Document" tab.

Yes, I agree.

9. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, the Division of Emergency Management is unable to issue a grant. Sub-Grantees may not sub grant funds.

Yes, I understand.

Application Questions [top](#)

1. Name of the Homeland Security Grant Program (HSGP) funding stream you are requesting funding for:

State Homeland Security Program (SHSP)

Urban Area Security Initiative (UASI)

2. Name of Project

Name the project by the jurisdiction name and project intent.

3. Classification - click the primary intention of the Proposed Project (NEW, MAINTAIN, or ENHANCE)

A list of the Strategic Programs is in the Nevada Homeland Security and Emergency Management Enterprise 2022 document in the resource documents section (Page 6).

- Project is NEW (No grant-funded projects have recently addressed this capability within the past five years; OR the project has not been funded in the past). YOUR PROJECT WILL BE COMPETITIVE

Project will be MAINTAINED - Project is a FFY 22 Strategic Program and with minimal budget change

Project is an ENHANCEMENT - Project is a FFY 22 Strategic Program with a significant budget change -YOUR PROJECT WILL BE COMPETITIVE

4. Please enter the name of the Strategic Program exactly as it appears on Page 6 of the Nevada Homeland Security and Emergency Management Enterprise 2022.

If your project is enhanced it will be considered competitive.

PLANNING

- Planning effort to maintain Community Resilience.

5. Please choose one of the five mission areas or you may choose "All of the Above".

Prevention. Prevent, avoid or stop an imminent, threatened or actual act of terrorism

Protection. Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.

Mitigation. Reduce the loss of life and property by lessening the impact of future disasters.

Response. Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.

Recovery. Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

- All of the Above

6. Please select ONE main core capability for your project. If your project does not fit in this list choose not applicable and see question 7.

A description of Mission Areas and Core Capabilities can be found at: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

Fatality Management Services

Fire Management and Suppression

Infrastructure Systems

Logistics and Supply Chain Management

Mass Care Services

Mass Search and Rescue Operations

- On-Scene Security, Protection, and Law Enforcement

Operational Communication

Public Health, Healthcare, and Emergency Medical Services

Health and Social Services

Economic Recovery

Natural and Cultural Resources

Housing

Not Applicable (choose from the second list)

7. If you selected not applicable on question 6, please select one main core capability from this list. Otherwise, select not applicable.

preparedness/mission-core-capabilities

- Planning
- Public Information and Warning
- Operational Coordination
- Forensics and Attribution
- Intelligence and Information Sharing
- Interdiction and Disruption
- Screening, Search and Detection
- Access Control and Identity Verification
- Physical Protective Measures
- Cybersecurity
- Supply Chain Integrity and Security
- Risk Management for Protection Programs and Activities
- Risk and Disaster Resilience Assessment
- Community Resilience
- Long-term Vulnerability Reduction
- Threats and Hazards Identification
- Environmental Response/Health and Safety
- ✓ Critical Transportation
- Situational Assessment
- Not Applicable

8. Please select the National Priority Area that your project applies to. If your project is not one of the 6 listed National Priority Areas, select "State Priority"

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

- ✓ Enhancing Community Preparedness and Resilience
 - Enhancing the Protection of Soft Targets/Crowded Places
 - Enhancing Information Sharing and Intelligence Sharing and Analysis and cooperation with federal agencies including DHS
 - Combatting Domestic Violent Extremism
 - Enhancing Cyber Security
 - Enhancing Election Security
 - State Priority

9. Please identify how much funding is allocated to the project to the National Priority?

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

3%

10. Describe how your project fits into the FFY 2022 National Priority or state strategic priorities. Please ensure your project falls under the listed core capability and lifelines.

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

The communities of Elko County and the surrounding areas face a number of significant threats to their residents and critical infrastructure. These threats, such as terrorism, natural disasters and violent crime require our first responders to be constantly prepared for any critical incidents that may occur in the area. The extensive flooding that impacted both the City of Elko and the entire county in February of 2017, which damaged and closed roads and forced some local residents to be evacuated, shows the severity of the threats facing the region.

To better help prepare for such incidents, our local law enforcement departments work together to sustain the highly trained Elko Special Response Team (ESRT) to respond to all high risk critical call outs that occur within the county. In

must have sufficient equipment to do the job. At this time, however, we lack access to a vehicle capable of meeting our needs for responding to catastrophic incidents such as natural disasters and terrorist attacks, performing rescues and evacuations in adverse conditions, or for protecting the team and civilians from ballistic attacks.

As the ESRT is responsible for responding to all incidents that exceed the capability of patrol within our jurisdiction, including terrorist attacks, hostage situations and mass shooting incidents, we hereby request \$475,580.00 in funding to purchase a tactical multipurpose Response and Rescue Vehicle.

This vehicle offers hardened walls and blast proof windows allowing our team to deploy directly into hot zones to respond to ongoing emergencies. The vehicle offers 4-wheel drive capability, run flat tires, and the potential to reach highway speeds, helping us to respond to calls throughout our entire jurisdiction quickly in all road conditions. These capabilities will allow us to work off road when responding to calls in rural and remote areas of the county, while still allowing us to respond quickly to incidents taking place within in the City of Elko's more densely populated neighborhoods. The off-road capabilities will enable us to maneuver over road debris in the aftermath of natural disasters such as wildfires and flash floods and to navigate flood prone roadways in communities located along the Humboldt River or any of the area's numerous other waterways. The vehicle can carry up to 12 operators in full tactical gear and can fit up to 20 civilians in need of rescue or evacuation from violent incidents or natural disasters.

In addition to the vehicle's rugged body and durable tires, it also includes several other features that will help our SRT team members perform their duty. This includes two remote control spotlights that are capable of providing lighting in darkened areas and assisting us in search and rescue operations as well as a 4-way camera can be attached to the hydraulic ram to penetrate barricaded structures. This will allow the team to see inside barricaded areas to make sure there is no threat to officers, suspects, or hostages before attempting an entry.

In addition to protecting officers and civilians from ballistic attacks, a Rescue and Response Vehicle will increase cooperative efforts with other area first responders, improving our ability to respond to terrorist attacks, natural disasters, or other mass casualty events. The vehicle's various features will also allow us to work with paramedics and area fire units in performing rescues in adverse conditions, such as during flooding events when standard emergency response vehicles are not able to deploy due to their low ground clearance, or in the aftermath of wildfires or other natural disasters when our area's fire trucks and ambulances are not able to access affected areas due to debris or damaged roadways.

Recent terrorist attacks in the United States have involved individuals carrying out mass shootings in crowded areas, the ability to utilize a vehicle capable of protecting officers and civilians from ballistic attacks could not be more important to Law Enforcement Terrorism Prevention (LETP) efforts. Additionally, the vehicle can also support LETP efforts by acting as a mobile means of target hardening. Due to its many protective features, the vehicle can be used to protect outdoor events from the type of vehicle-based attacks that have been seen both domestically and internationally over the past several years. As such, terrorist incidents can be the work of either individual domestic extremists or larger organizations, these LETP capabilities can be used to combat lone wolf attacks as well as to disrupt Complex Coordinated Terrorist Attacks (CCTAs)

We have chosen this investment both because it improves the effectiveness and the safety of our tactical unit and because it is cost effective. The lives of first responders, innocent civilians and even violent suspects are priceless and protecting them is our highest priority. This vehicle will reduce liability, enhance capability, and expand rescue options, allowing us to minimize personal injury and property damage.

The ESRT has jurisdiction throughout the entirety of Elko County, a 17,203 square mile region with a growing population of 53,702 residents. This leaves us responsible for performing operations in both the smaller municipalities and unincorporated communities of the county, as well as within larger municipalities such as the City of Elko (17.86 square miles with 20,564 residents). Through mutual aid agreement, the team also performs tactical operations within Lander, White Pine and Eureka Counties. In addition to the counties previously mentioned, the ESRT also routinely partners with Washoe County during major events such as motorcycle rallies etc. in an effort to offer aid and support.

There are numerous examples of critical infrastructure, soft targets, and crowded places in and around Elko County that this vehicle could protect from terrorist attacks or other threats. This includes:

- Great Basin Community College has 3,836 students on a 44 acre campus.
 - Elko County is home to 33 schools, with 7 high schools, 8 middle schools, 14 elementary schools, 2 alternative schools, 1 charter school, and 1 private school.
 - Northeastern Nevada Regional Hospital is a 59 bed facility with an ER and radiology equipment.
 - Elko Regional Airport is a 700 acre facility with 2 runways that serves commercial passenger flights.
 - There are numerous gold mines within the Elko area, with mining serving as the county's top industry.
 - The Carlin Tunnel is a .3 mile long structure with 4 tubes that serves train lines and 10,000 vehicles per day.
 - I-80 crosses the region with 34 separate exits located within the Elko County, Eureka County, Lander County area.
- The ESRT has been involved in numerous high-risk call outs that show this jurisdiction's vulnerability. This includes a number of barricaded gunman and hostage incidents that forced the team to approach isolated buildings and to

the standoffs had fired their weapons, as well as an incident from June 2021 where the team was called in after a homicide suspect had fired on state workers while driving through a construction zone and then led law enforcement on a pursuit before crashing his car. The team responded to another incident in March 2020 in White Pine County after a gunman shot and killed a Nevada Highway Patrolman, burned his body at the scene and fled the scene with his state patrol vehicle. The team apprehended the suspect in a rural area of Nevada and collaborated with agencies from Las Vegas to help process the crime scene. During this particular incident, an MRAP was used in the apprehension; however, it was less than ideal given the very soft, uneven terrain the suspect fled to. Such events show the need for our area to obtain a rescue vehicle that offers protection from ballistic and explosive threats and 4-wheel drive capability in order to protect our operators and civilians during all incidents.

The City of Elko suffers from a high violent crime rate and the entire county lies in a region that is considered "Relatively High Risk for Wildfires" (FEMA National Risk Index- January 2022). Despite these facts, the only vehicle the team has access to when performing tactical operations is a military surplus MRAP. With the acquisition of a Rescue and Response Vehicle, the ESRT will be better equipped to handle calls throughout our jurisdiction and will have better protection to help prepare us for any type of attack that may occur within the region. With the safety provided by the truck's hardened walls and windows we will be able enter hot zones to rescue civilians and increase the likelihood of a quick and positive resolution to incidents, while also being better prepared to assist our fellow first responders by performing rescues and evacuations in the immediate aftermath of natural disasters in areas that may be inaccessible using standard equipment.

Multiple federal government agencies have complimented the effectiveness of this type of vehicle in responding to critical incidents. They affirm its capability to protect responding personnel and citizenry during HazMat and mass casualty incidents. Furthermore, these agencies and law enforcement agencies throughout the country currently use these vehicles as a key tool to prevent acts of terrorism. The Elko Special Response Team needs this equipment so that we can continue to protect against, mitigate the effects of, respond to and recover from terrorism and natural disasters. This investment will increase integration among first responders allowing us to protect against the widest variety of hazards so that we can fulfill our duty to safeguard our immediate and surrou

11. Describe the investment or project, specifically how it addresses gaps and/or sustainment in the Threat and Hazard Identification Risk Assessment (THIRA)/Stakeholder Preparedness Review (SPR).

This question is specifically asked in the Investment Justification.

This project directly correlates to the five mission areas of the National Preparedness Goal: Prevention, Protection, Mitigation, Response and Recovery.

The current capabilities of the ESRT to respond to the vast rural areas located in Elko County during a time of an emergency, whether terroristic or natural disaster, have been severely limited by the vehicle available to the ESRT- a surplus issued MRAP. While this vehicle does offer protection from most ballistic threats, the MRAP's size and low speed prevent it from being used on many operations, as it is too heavy to cross a number of bridges or travel on dirt roads in our rural communities and too slow to respond to emergencies that might occur in areas hundreds of miles from where the vehicle is stationed. The MRAP also suffers from frequent mechanical issues that force it to be sent to specialized facilities for maintenance that can be both very expensive and very time consuming, due to the rarity of the parts required for the vehicle, which can leave our team without effective protection during operations, placing both our operators and civilians at risk during critical incidents.

The acquisition of a Rescue and Response Vehicle will significantly increase the response and recovery times of both civilians and officers in any situation. In addition to facilitating a better response and recovery operation, obtaining a Rescue and Response Vehicle offers maneuverability previously unattainable through the use of an MRAP. This will enable the ESRT to better prevent and/or stop a terroristic threat or direct threat to the community faster than previously able to. A Rescue and Response Vehicle offers protection for officers and civilians alike with the capability to hold up to 14 fully equipped operators or 20 civilians. The maneuverability aspect will enable the ESRT to reach locations previously unattainable by the use of an MRAP due to its high ground clearance, lighter weight and greater visibility and allow the safe insertion and evacuation of operators during high risk scenarios.

Bottom line, the current use of an MRAP delays response times and can only be deployed to certain areas that can handle its weight and roll radius, this is a gap in capabilities for the ESRT. By purchasing a Rescue and Response Vehicle, the ESRT can significantly increase its response time to incidents in both Elko County and surrounding counties while prioritizing safety for both officers and civilians.

12 Please explain your project's nexus to terrorism.

addition to having Highway 93 run north and south just 50 miles east in the town of Wells. Elko is home to a regional airport and a regional hospital as well as the largest gold mining complex in the world, Nevada Gold Mines. Elko's location and transportation roadways makes it vulnerable to the possibility of the transportation of both biological and chemical weapons. In 2019 a train derailment caused a two day shut down of the railway due to military ordinance being aboard the train. For this incident, both the ESRT and Elko Bomb Squad responded to secure the scene until state and federal officials arrived the take possession of the ordinance. This incident highlighted the fragility of the railway system and the vulnerability of the transportation system in Elko County. In addition to roadways and transportations systems, the vast square mileage of Elko County leaves acres upon acres of land unvisited, making it a prime location for extremists, both foreign and domestic, to develop plans and create weaponry to carry out an attack.

With the light weight, off road capability, along with the safety provided by a Rescue and Response Vehicle's hardened walls and windows we will be able enter hot zones to protect our officers, rescue civilians and increase the likelihood of a quick and positive resolution to incidents, while also being better prepared to assist our fellow first responders by performing rescues and evacuations in the immediate aftermath of an attack.

The ESRT often partners with the Elko Bomb Squad with four bomb technicians dual trained as ESRT operators, one of the few tactical/rescue teams in the country to utilize and combine these resources. The acquisition of a Rescue and Response Vehicle would also be at the disposal of the Elko Bomb Squad should they need to use it for civilian evacuation, additional armor, blast protectant, etc.

13. Project Outcome (Describe the goal of the Proposed Project in a summary statement). Describe the Proposed Project. Quantify the Capability. Identify the users and the beneficiaries of the capability. What will this project do for the entire State of Nevada? Identify the geographic location of the project (Specify County, Multiple Counties (List), Urban Area, or Statewide.)

The project outcome would be to secure a Rescue and Response Vehicle fully funded through the HSGP grant. With 75% of the ESRT's critical response locations in rural areas of the county, a Rescue and Response Vehicle is a much more practical choice for transportation. The procurement of a Rescue and Response Vehicle would enable the ESRT to reach critical scenes sooner with more fully equipped operators on board as opposed to the ESRT's current means for transportation. Sometimes traveling hundreds of miles to scenes, the current mode of transportation (MRAP) is unable to reach highway speeds and often delays response time for the ESRT, wasting precious time when responding to situations of active shooters, homicide suspects at large or civilians trapped in natural disasters (such as the catastrophic flood in 2017).

The ESRT has a core area of responsibility in Elko County, NV but often responds to the neighboring counties of Lander County, NV, White Pine County, NV, Eureka County, NV, and Humboldt County, NV pursuant to current MOUs. The ESRT has also been called to assist in incidents in the Reno/Sparks area.

In addition to providing superior protection and off road capabilities, a Rescue and Response Vehicle is far more low profile than an MRAP. In the current time of policing, it is imperative to underscore law enforcement in the capacity for which they serve, the citizens, as opposed to appearing as a more militarized organization. While the MRAP does provide armor benefits, it is also very apparent that it is a military surplus vehicle, making it hard for citizens to separate the militarization of the police department. The ESRT would benefit from a Rescue and Response Vehicle as a lower profile rescue vehicle as opposed to a military vehicle such as the MRAP. This is an opportunity to foster better community relations and possibly prevent situations such as riots or opposition to law enforcement due to the appearance of a militarized force.

14. Project Implementation - Describe how, and by whom, the proposed project will be implemented. Describe the process by which the project will be accomplished. Identify who (i.e., staff, contract) will perform the work.

Once the funds have been granted, a previously researched and agreed upon Rescue and Response Vehicle will be purchased. Once the vehicle is in the possession of the Elko Police Department it will be trained on and implemented by members of the ESRT. The vehicle will also be maintained by the ESRT and/or city shops for routine maintenance. The vehicle, when not in use, will be stored at the Elko Police Department, in an auxiliary building, out of the elements and out of public view. ESRT operators will be trained on how to operate the vehicle and will be signed off accordingly to maintain training records for the vehicle.

15. How much of this Investment in dollars will be obligated towards Law Enforcement Terrorism Prevention Activities (LETPA) Under 6 U.S.C. § 607. The LETPA allocation may be met by funding projects in any combination

For additional information, you may review: 6 USC 607 (a) 2 here: [https://uscode.house.gov/view.xhtml?req=\(title:6%20section:607%20edition:prelim\)](https://uscode.house.gov/view.xhtml?req=(title:6%20section:607%20edition:prelim))

100% of the funding would obligated to LETPA

16. Sustainment Plan: Identify any continuing financial obligation created by the Project, and proposed funding solution.

Built on a Ford F550 chassis, the Rescue and Response Vehicle is inexpensive to service and maintain. To sustain the capabilities supporting this project, we will provide our team with regular training on this vehicle so that we can build and maintain a high level of proficiency. Our department will maintain the vehicle so that it remains in a constant state of operational readiness, and we will use our own resources to provide regular upkeep so that the vehicle lasts its expected 10-15 years.

17. Can this project funding request be reduced? Is it scaleable? Please answer Yes or No, and explain below.

Yes. The quotes received in researching this project include three models which can be built up or down depending on mission requirements and funding constraints.

18. Project Location: Provide the 5-digit zip code where the project will be executed. The project location could be distinct from the sub-recipient address.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

89801

19. Build or Sustain: Select "build" if this project focuses on starting a new capability or the intent of the project is to close a capability gap or "sustain" if the purpose of the project strictly maintains a core capability at its existing current level.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Build

Sustain

20. Is this request deployable? All assets supported in part or entirely with FFY 2022 HSGP funding must be readily deployable and NIMS-typed when possible to support emergency or disaster operations per existing Emergency Management Assistance Compact (EMAC) under 6 U.S.C. § 609, and any other applicable provision of the Homeland Security Act of 2002, as amended. Is the core capability supported by this project deployable to other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

21. Shareable: Is the core capability supported by this project shareable with other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

22. Does this project support a NIMS typed resource? If yes, continue to the next question. <p> To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

23. Enter the name of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Special Weapons and Tactics Team

24. Enter the ID of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not

25. Does this project require new construction, renovation, retrofitting, or modifications of an existing structure?

Please see slides 4 and 5 of EHP Screening Instructions in the "Resource Documents" tab. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No.

26. Does this project support a previously awarded project or investment? If yes, list up to three prior years' investments or projects, include the year, investment name, and the last milestone completed. The milestones are defined as Initiate, Plan, Execute, Control or Closeout.

Example: 2019, Recovery Framework, Control - 2020, Recovery Framework, Closeout - 2021 no project submitted. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No.

27. FEMA/DHS requires grant-funded projects to be categorized under project management to have a beginning and end. Under this direction, please choose one of the following: Initiate, Plan, Execute, Control or Closeout. Most projects will fall under Initiate, however, several projects may be in phase 2 or phase 3 of multiyear projects.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

- ✓ Initiate - The authorization to begin work or resume work on any particular activity.
- Plan - The purposes of establishing, at an early date, the parameters of the project that is going to be worked on as well as to try to delineate any specifics and/or any peculiarities to the project as a whole and/or any specific phases of the project.
- Execute - The period within the project lifecycle during which the actual work of creating the project's deliverables is carried out.
- Control - A mechanism which reacts to the current project status in order to ensure accomplishment of project objectives. This involves planning, measuring, monitoring, and taking corrective action based on the results of the monitoring.
- Close Out - The completion of all work on a project. Can also refer to completion of a phase of the project.

28. Separate your budget into categories for the Standard form A- Budget Information for Non-Construction Programs (SF-424A)

	Personnel (Not Contractors) Amount
	Personnel Fringe Benefits (Not Contractors) Amount
	Travel Amount

Pre-Application [top](#)

1. To qualify for this grant you must be a state, territory, local, or tribal government. Are you a state, territory, local, or tribal government?

Yes

No

2. Did you participate in the Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR) process? Answering No will not affect your ability to apply for FFY 2022 grant funds.

Please ensure you send a representative to participate in the FFY 2021 THIRA process to be eligible for the FFY 2022 Homeland Security Grant Program funds.

Yes

No, However our agency/jurisdiction will send a representative this year to participate.

3. Did you activate your emergency operation center for COVID-19 response and recovery and/or hold a tabletop exercise in the calendar year 2021 or 2022?

4. All funds granted under the Homeland Security Grant Program must focus on preventing terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. Does your application focus on this requirement? If it does not, your application is not eligible.

Yes

No

5. National Incident Management System (NIMS) implementation is required before allocating any federal preparedness awards in FFY 2022. Recipients must ensure and maintain the adoption and implementation of NIMS. Are you NIMS compliant?

Please reference the Notice of Funding Opportunity for FFY2021 as a guideline for NIMS compliance until the FFY2022 Notice of Funding Opportunity is released and will supersede.

Yes, we have formally adopted NIMS

No

No, but we will be compliant prior to receiving grant funds

6. In order for your application to be considered, you must attend open meetings to testify in front of either the Nevada Resilience Advisory Committee (NRAC) or Urban Area Working Group (UAWG) as well as Committee on Finance (COF) and the Nevada Commission on Homeland Security (NCHS). This is a requirement of the grant. If you do not send representation, your application will not be considered.

The NRAC Meeting will be held on 05/31/2022 :: The UAWG Meeting will be held on 05/26/2022 & 06/01/2022 :: Further Dates can be found in the Resource Documents in the FFY22 HSGP Timeline

Yes, I agree.

7. Did you participate in the Integrated Preparedness Plan Workshop (IPPW)?

Yes, my jurisdiction participated

No, my jurisdiction did not participate

8. All procurement is required to be compliant with Nevada Revised Statute 333 and/or Nevada Revised Statute 332. Per FEMA legal opinion, locals may not use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2CFR Part 200. All procurement must be free and open competition. Any sole source procurement must be pre-approved in writing by the DEM in advance of the procurement.

You may view the written legal opinion in the "Resource Document" tab.

Yes, I agree.

9. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, the Division of Emergency Management is unable to issue a grant. Sub-Grantees may not sub grant funds.

Yes, I understand.

Application Questions [top](#)

1. Name of the Homeland Security Grant Program (HSGP) funding stream you are requesting funding for:

State Homeland Security Program (SHSP)

Urban Area Security Initiative (UASI)

2. Name of Project

Name the project by the jurisdiction name and project intent.

Emergency Operation Center Technology Project

A list of the Strategic Programs is in the Nevada Homeland Security and Emergency Management Enterprise 2022 document in the resource documents section (Page 6).

- ✓ Project is NEW (No grant-funded projects have recently addressed this capability within the past five years; OR the project has not been funded in the past). YOUR PROJECT WILL BE COMPETITIVE
- Project will be MAINTAINED - Project is a FFY 22 Strategic Program and with minimal budget change
- Project is an ENHANCEMENT - Project is a FFY 22 Strategic Program with a significant budget change -YOUR PROJECT WILL BE COMPETITIVE

4. Please enter the name of the Strategic Program exactly as it appears on Page 6 of the Nevada Homeland Security and Emergency Management Enterprise 2022.

If your project is enhanced it will be considered competitive.

Infrastructure Systems

5. Please choose one of the five mission areas or you may choose "All of the Above".

Prevention. Prevent, avoid or stop an imminent, threatened or actual act of terrorism

Protection. Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.

Mitigation. Reduce the loss of life and property by lessening the impact of future disasters.

Response. Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.

Recovery. Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

- ✓ All of the Above

6. Please select ONE main core capability for your project. If your project does not fit in this list choose not applicable and see question 7.

A description of Mission Areas and Core Capabilities can be found at: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

Fatality Management Services

Fire Management and Suppression

Infrastructure Systems

Housing

- ✓ Not Applicable (choose from the second list)

7. If you selected not applicable on question 6, please select one main core capability from this list. Otherwise, select not applicable.

A description of Mission Areas and Core Capabilities: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

Planning

- ✓ Operational Coordination
- Forensics and Attribution
- Intelligence and Information Sharing
- Interdiction and Disruption
- Screening, Search and Detection
- Access Control and Identity Verification
- Physical Protective Measures
- Cybersecurity
- Supply Chain Integrity and Security
- Risk Management for Protection Programs and Activities
- Risk and Disaster Resilience Assessment
- Community Resilience
- Long-term Vulnerability Reduction
- Threats and Hazards Identification
- Environmental Response/Health and Safety
- Critical Transportation
- Situational Assessment
- Not Applicable

8. Please select the National Priority Area that your project applies to. If your project is not one of the 6 listed National Priority Areas, select "State Priority"

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

- Enhancing Community Preparedness and Resilience
- Enhancing the Protection of Soft Targets/Crowded Places
- ✓ Enhancing Information Sharing and Intelligence Sharing and Analysis and cooperation with federal agencies including DHS
- Combatting Domestic Violent Extremism
- Enhancing Cyber Security
- Enhancing Election Security
- State Priority

9. Please identify how much funding is allocated to the project to the National Priority?

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

3%

10. Describe how your project fits into the FFY 2022 National Priority or state strategic priorities. Please ensure your project falls under the listed core capability and lifelines.

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

The project will allow for collaboration and coordination of information during an emergency by utilizing technology to gather and share information utilizing the requested interactive touch monitor.

11. Describe the investment or project, specifically how it addresses gaps and/or sustainment in the Threat and Hazard Identification Risk Assessment (THIRA)/Stakeholder Preparedness Review (SPR).

This question is specifically asked in the Investment Justification.

The 2022 THIRA for the State of Nevada identifies threats hazards to which existing capabilities were measured. This project will fill the gaps in capabilities in the area of operational coordination between fire department and unified commands of responding agencies and law enforcement to any type of act of terrorism.

Our jurisdiction has 4 schools and host annually the Clark County Fair and Rodeo which had 108,000 attendees over a 5 day period which is a possible location of a terrorist attack. We need the technology to be able to plan, coordinate, collaborate our response if there is ever a terrorist attack within our community.

13. Project Outcome (Describe the goal of the Proposed Project in a summary statement). Describe the Proposed Project. Quantify the Capability. Identify the users and the beneficiaries of the capability. What will this project do for the entire State of Nevada? Identify the geographic location of the project (Specify County, Multiple Counties (List), Urban Area, or Statewide.)

The project outcome is to have the technology available local to be able to pull up maps, date, location, and to collaborate and coordinate on a touch screen board for all to see within the Emergency Operation Center. The information drawn, gathered, or captured can then be dragged, saved, and erase as the operation evolves. In turn, will save time and also can be used later for reporting purposes.

14. Project Implementation - Describe how, and by whom, the proposed project will be implemented. Describe the process by which the project will be accomplished. Identify who (i.e., staff, contract) will perform the work. Moapa Valley Fire District will follow Clark County purchasing policies and procedures according to NRS 332 and get quotes from vendors to meet the NRS and grant requirements.

15. How much of this Investment in dollars will be obligated towards Law Enforcement Terrorism Prevention Activities (LETPA) Under 6 U.S.C. § 607, The LETPA allocation may be met by funding projects in any combination of the five National Priority Areas identified above and any other investments.

For additional information, you may review: 6 USC 607 (a) 2 here: [https://uscode.house.gov/view.xhtml?req=\(title:6%20section:607%20edition:prelim\)](https://uscode.house.gov/view.xhtml?req=(title:6%20section:607%20edition:prelim))

0

16. Sustainment Plan: Identify any continuing financial obligation created by the Project, and proposed funding solution.

There is no continued financial obligation needed if the grant is awarded and implemented.

17. Can this project funding request be reduced? Is it scalable? Please answer Yes or No, and explain below.

No, since we are only requesting one touch screen monitor, therefore, the project can not be reduced. We also do not need more than one monitor so therefore the project is not scalable either.

18. Project Location: Provide the 5-digit zip code where the project will be executed. The project location could be distinct from the sub-recipient address.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

89021

19. Build or Sustain: Select "build" if this project focuses on starting a new capability or the intent of the project is to close a capability gap or "sustain" if the purpose of the project strictly maintains a core capability at its existing current level.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Build

Sustain

20. Is this request deployable? All assets supported in part or entirely with FFY 2022 HSGP funding must be readily deployable and NIMS-typed when possible to support emergency or disaster operations per existing Emergency Management Assistance Compact (EMAC) under 6 U.S.C. § 609, and any other applicable provision of the Homeland Security Act of 2002, as amended. Is the core capability supported by this project deployable to other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

21. Shareable: Is the core capability supported by this project shareable with other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No

22. Does this project support a NIMS typed resource? If yes, continue to the next question.<p> To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

23. Enter the name of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

EOC Management Support Team

24. Enter the ID of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

2-508-1045

25. Does this project require new construction, renovation, retrofitting, or modifications of an existing structure?

Please see slides 4 and 5 of EHP Screening Instructions in the "Resource Documents" tab. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

No

26. Does this project support a previously awarded project or investment? If yes, list up to three prior years' investments or projects, Include the year, investment name, and the last milestone completed. The milestones are defined as Initiate, Plan, Execute, Control or Closeout.

Example: 2019, Recovery Framework, Control - 2020, Recovery Framework, Closeout - 2021 no project submitted. This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes, 2021 MCI Project which was awarded. We are currently in the execute stage.

27. FEMA/DHS requires grant-funded projects to be categorized under project management to have a beginning and end. Under this direction, please choose one of the following: Initiate, Plan, Execute, Control or Closeout. Most projects will fall under Initiate, however, several projects may be in phase 2 or phase 3 of multiyear projects.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Initiate - The authorization to begin work or resume work on any particular activity.

Plan - The purposes of establishing, at an early date, the parameters of the project that is going to be worked on as well as to try to delineate any specifics and/or any peculiarities to the project as a whole and/or any specific phases of the project.

Execute - The period within the project lifecycle during which the actual work of creating the project's deliverables is carried out.

Control - A mechanism which reacts to the current project status in order to ensure accomplishment of project objectives. This involves planning, measuring, monitoring, and taking corrective action based on the results of the monitoring.

Close Out - The completion of all work on a project. Can also refer to completion of a phase of the project.

28. Separate your budget into categories for the Standard form A- Budget Information for Non-Construction Programs (SF-424A)

Pre-Application [top](#)

1. To qualify for this grant you must be a state, territory, local, or tribal government. Are you a state, territory, local, or tribal government?

✓ Yes

No

2. Did you participate in the Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR) process? Answering No will not affect your ability to apply for FFY 2022 grant funds. Please ensure you send a representative to participate in the FFY 2021 THIRA process to be eligible for the FFY 2022 Homeland Security Grant Program funds.

✓ Yes

3. Did you activate your emergency operation center for COVID-19 response and recovery and/or hold a tabletop exercise in the calendar year 2021 or 2022?

Yes. Nye County's Emergency Operations Center will remain in operation until May 20th, 2022.

4. All funds granted under the Homeland Security Grant Program must focus on preventing terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. Does your application focus on this requirement? If it does not, your application is not eligible.

Yes

No

5. National Incident Management System (NIMS) implementation is required before allocating any federal preparedness awards in FFY 2022. Recipients must ensure and maintain the adoption and implementation of NIMS. Are you NIMS compliant?

Please reference the Notice of Funding Opportunity for FFY2021 as a guideline for NIMS compliance until the FFY2022 Notice of Funding Opportunity is released and will supersede.

Yes, we have formally adopted NIMS

No

No, but we will be compliant prior to receiving grant funds

6. In order for your application to be considered, you must attend open meetings to testify in front of either the Nevada Resilience Advisory Committee (NRAC) or Urban Area Working Group (UAWG) as well as Committee on Finance (COF) and the Nevada Commission on Homeland Security (NCHS). This is a requirement of the grant. If you do not send representation, your application will not be considered.

The NRAC Meeting will be held on 05/31/2022 :: The UAWG Meeting will be held on 05/26/2022 & 06/01/2022 :: Further Dates can be found in the Resource Documents in the FFY22 HSGP Timeline

Yes, I agree.

7. Did you participate in the Integrated Preparedness Plan Workshop (IPPW)?

Yes, my jurisdiction participated

No, my jurisdiction did not participate

8. All procurement is required to be compliant with Nevada Revised Statute 333 and/or Nevada Revised Statute 332. Per FEMA legal opinion, locals may not use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2CFR Part 200. All procurement must be free and open competition. Any sole source procurement must be pre-approved in writing by the DEM in advance of the procurement.

You may view the written legal opinion in the "Resource Document" tab.

Yes, I agree.

9. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, the Division of Emergency Management is unable to issue a grant. Sub-Grantees may not sub grant funds.

Yes, I understand.

Application Questions [top](#)

1. Name of the Homeland Security Grant Program (HSGP) funding stream you are requesting funding for:

State Homeland Security Program (SHSP)

Urban Area Security Initiative (UASI)

2. Name of Project

3. Classification - click the primary intention of the Proposed Project (NEW, MAINTAIN, or ENHANCE)

A list of the Strategic Programs is in the Nevada Homeland Security and Emergency Management Enterprise 2022 document in the resource documents section (Page 6).

- Project is NEW (No grant-funded projects have recently addressed this capability within the past five years; OR the project has not been funded in the past). YOUR PROJECT WILL BE COMPETITIVE
- Project will be MAINTAINED - Project is a FFY 22 Strategic Program and with minimal budget change
- Project is an ENHANCEMENT - Project is a FFY 22 Strategic Program with a significant budget change -YOUR PROJECT WILL BE COMPETITIVE

4. Please enter the name of the Strategic Program exactly as it appears on Page 6 of the Nevada Homeland Security and Emergency Management Enterprise 2022.

If your project is enhanced it will be considered competitive.
Planning efforts to maintain Continuity of Operations.

5. Please choose one of the five mission areas or you may choose "All of the Above".

Prevention. Prevent, avoid or stop an imminent, threatened or actual act of terrorism

Protection. Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.

Mitigation. Reduce the loss of life and property by lessening the impact of future disasters.

Response. Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.

Recovery. Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

- All of the Above

6. Please select ONE main core capability for your project. If your project does not fit in this list choose not applicable and see question 7.

A description of Mission Areas and Core Capabilities can be found at: <https://www.fema.gov/emergency-managers/national-preparedness/mission-core-capabilities>

Fatality Management Services

Fire Management and Suppression

- Infrastructure Systems

Logistics and Supply Chain Management

Mass Care Services

Mass Search and Rescue Operations

On-Scene Security, Protection, and Law Enforcement

Operational Communication

Public Health, Healthcare, and Emergency Medical Services

Health and Social Services

Economic Recovery

Natural and Cultural Resources

Housing

Not Applicable (choose from the second list)

7. If you selected not applicable on question 6, please select one main core capability from this list. Otherwise, select not applicable.

- Planning
- Public Information and Warning
- Operational Coordination
- Forensics and Attribution
- Intelligence and Information Sharing
- Interdiction and Disruption
- Screening, Search and Detection
- Access Control and Identity Verification
- Physical Protective Measures
- Cybersecurity
- Supply Chain Integrity and Security
- Risk Management for Protection Programs and Activities
- Risk and Disaster Resilience Assessment
- Community Resilience
- Long-term Vulnerability Reduction
- Threats and Hazards Identification
- Environmental Response/Health and Safety
- Critical Transportation
- Situational Assessment
- Not Applicable

8. Please select the National Priority Area that your project applies to. If your project is not one of the 6 listed National Priority Areas, select "State Priority"

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

- Enhancing Community Preparedness and Resilience
- Enhancing the Protection of Soft Targets/Crowded Places
- Enhancing Information Sharing and Intelligence Sharing and Analysis and cooperation with federal agencies including DHS
- Combatting Domestic Violent Extremism
- Enhancing Cyber Security
- Enhancing Election Security
- State Priority

9. Please identify how much funding is allocated to the project to the National Priority?

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

SHSP: \$415,000,000.00; Enhancing Cyber Security, no minimum percentage.

10. Describe how your project fits into the FFY 2022 National Priority or state strategic priorities. Please ensure your project falls under the listed core capability and lifelines.

Please refer 2022 HSGP Notice of Funding Opportunity once it has been released.

The last few years has brought sharp focus to the cybersecurity risks and vulnerability of our Nations critical infrastructure and the active need to assess and continue to improve and protect these systems and the functions they support. Nye County has also been actively focused on improving our Cybersecurity posture for the local, State, and collective benefit as Cybersecurity is one of the biggest risks to our National Security and resiliency.

This Cybersecurity project is intended to build and develop an enterprise cybersecurity program within Nye County that directly fits into many of the priorities identified in both the FFY 2022 State and National priorities and is focused on

The project's focus will be to conduct a data discovery and comprehensive systems security assessment, process flow discovery, a detailed security controls analysis and a risk assessment for the systems and processes that store or process sensitive information. A controls assessment - gap analysis and best practice review and followed by remediation of the assessment findings, including a cyber resilience review for ransomware impact and recovery, and followed up by comprehensive internal and external Penetration (PEN) testing conducted to validate control and vulnerability exposure.

The gap analysis will determine the status of our environment in terms of security posture and will use the controls from the standard cybersecurity process steps to Identify, Protect, Detect, Respond and Recover in the NIST Framework. This will be used to find technical controls already in place and research the desired state of controls to create needed security policies as part of the project.

Within this project is time committed towards performing a Business Impact Assessment (BIA) for identifying and prioritizing IT systems and correlating them with business processes to determine impact and criticality if the systems were unavailable. This will determine, and document business processes in relation to the supporting IT systems and classify recovery criticality including Maximum Tolerable Downtime (MTD), Recovery Time Objective (RTO), and Recovery Point Objective (RPO).

In summary, this project will include:

- Data Discovery, Identification and Classification
- Security Controls Assessment
- Vulnerability and Risk Assessment – Gap Analysis
- Remediation Plan – Risk Matrix Development
- Remediation Assistance
- Penetration Testing to Validate Remediation
- Development of Policies and Procedures that Define Security Requirements
- Business Impact Assessment

Within Nye County, our IT services cover all departments - including Law Enforcement, Emergency Management, Criminal Justice and Prosecution, Fire and Medical, Elections, Finance, etc.

This project and the requested funding ties directly into many of the core capabilities and priorities as identified below.

Enhancing Cybersecurity:

This is the foundation of this project, it is directly intended to address Cybersecurity risk and protection of the applications, data, services, operations, resources, and communications used and provided by Nye County for all functions within our County Government.

- Cybersecurity
- Intelligence and Informational sharing
- Public Information and warning

Within Enhancing Cybersecurity, this project is directly intended to address the following priorities:

- Operational Coordination
- Risk Management for protection programs and activities
- Long-term vulnerability reduction
- Situational assessment
- Infrastructure Systems
- Operational Communications

Safety and Security:

- Cybersecurity risk assessments
- Projects that address vulnerabilities identified in cybersecurity risk assessments
- Improving cybersecurity of critical infrastructure to meet minimum levels identified by the Cybersecurity and Infrastructure Security Agency (CISA), and the National Institute of Standards and Technology Cybersecurity Frameworks.

Enhancing Elections security:

- Cybersecurity
- Intelligence and Informational sharing
- Long-term vulnerability reduction
- Situational assessment
- Infrastructure systems

Safety and security:

- Cybersecurity Risk assessments, training, and planning.
- Projects that address vulnerabilities identified in Cybersecurity risk assessments

Enduring needs (safety and security):

- Cybersecurity planning

The project as defined above will help make sure we move forward aggressively in Nye County toward our common goal of protection of our Critical infrastructure within the State of Nevada and our Nation.

11. Describe the investment or project, specifically how it addresses gaps and/or sustainment in the Threat and Hazard Identification Risk Assessment (THIRA)/Stakeholder Preparedness Review (SPR).

This question is specifically asked in the Investment Justification.

This project addresses gaps in the THIRA/SPR for both the State of Nevada and Nye County in several areas.

In addition to developing a written comprehensive cyber security program, the assessment will identify gaps in Nye County's existing cyber security processes and protocols and remediate identified gaps. The resulting capability increase in Cybersecurity will significantly improve our ability to maintain Continuity of Operations as well as several areas directly addressed in the THIRA/SPR, including Public Information and Warning, Operational Coordination, Intelligence and Information Sharing, Access Control and Identify Verification.

12. Please explain your project's nexus to terrorism.

Cyber-attacks have advanced from limited resource individuals looking for targets of opportunity to advanced, distributed, staged and even State sponsored sophisticated attacks that have been shown to have the ability to incapacitate, damage or destroy critical infrastructure. These attacks, if not mitigated thru continuing advancements in security processes, tools and techniques, can render the agencies that rely on these systems to provide services to the public unable to complete their mission and can cause direct risk to life safety for agency personnel and compromise their ability to mitigate and investigate other forms of terrorism for the protection of the public.

These changes have resulted in the understanding that physical terrorism is not the only concern to the health and safety of the public, the threat of cyberattack impacting infrastructure has become a daily occurrence and continues to be on an upward trend.

Many of the services provided by Government have become high profile targets and the cyber-defense of these targets has become of high importance to our State and Nation.

This project is intended to harden our critical infrastructure that supports Government operations of Nye County and the Law Enforcement communications, investigation, evidence collection and information sharing, as well as other departments involved in response post-incident disaster recovery, Fire/EMS services to pre-emptive training and public awareness campaigns initiated by the County.

13. Project Outcome (Describe the goal of the Proposed Project in a summary statement). Describe the Proposed Project. Quantify the Capability. Identify the users and the beneficiaries of the capability. What will this project do for the entire State of Nevada? Identify the geographic location of the project (Specify County, Multiple Counties (List), Urban Area, or Statewide.)

The goal of this project is to build and develop an enterprise Cybersecurity program with assessment to enhance protection of our critical IT infrastructure, identify and classify critical data, assess security controls, identify, and remediate risks & vulnerabilities, develop formal policies and procedures, test remediation effectiveness and work towards development of an IT Business Impact Assessment.

The project will encompass:

- Data discovery, identification & classification
- Security controls assessment
- Risk assessment
- Remediation plan development
- Remediation assistance
- Policy development following NIST standards
- Internal/external penetration (PEN) testing to validate remediation

This project will be focused on improvement of processes and security to align us more closely with NIST standards, identification and mitigation of risk, policy creation, testing and documentation, and BIA development.

The expected outcome of this project is having developed a security program that aligns us with NIST standards and identifying and correcting security deficiencies. This project will result with identification and classification of the data we are hosting, and risk identification, assistance with remediation, testing, policy creation and BIA development, which will put us in a position to continue expanding on the security program well into the future for the continued hardening and protection of Nye County's IT infrastructure.

Although the direct beneficiaries of this project will be Nye County, the resulting improved processes and security will bolster Cybersecurity throughout other Local, County, City, State and Federal agencies where we have either direct VPN connection to their network or interface routinely thru communications and information sharing. These include the following agencies: NV State DPS, NV AOC, NV SoS, NV DEM, NV DOT, NV DMV, NV H&HS, LV Metro PD, ICE, Town of Pahrump, and Esmeralda County.

14. Project Implementation - Describe how, and by whom, the proposed project will be implemented. Describe the process by which the project will be accomplished. Identify who (i.e., staff, contract) will perform the work.

Nye County Director of Information Technology and Contract Administrator will prepare and post a Request for Proposals for a Cybersecurity Program Development, with Business Impact Assessment, for approximately 21 days. After the posting period, the IT director will review all received and eligible proposals to select the best qualified proposal and vendor and make recommendation to Board of County Commissioners for final selection and acceptance of proposal.

Upon approval from BOCC and review/approval of contract by the Nye County District Attorney's office, IT Director will enter into a contract with selected vendor to complete the Security Program Development, with Business Impact Assessment.

Selected vendor will conduct a data discovery and comprehensive systems security assessment that will include interviews with key staff members for data and process flow discovery, a detailed security controls analysis, and a risk assessment for the systems and processes that store or process sensitive information. Gap analysis and best practice review will be conducted for other systems and IT infrastructure. Remediation to the assessment findings will be performed with due coordination with Nye County IT staff.

15. How much of this Investment in dollars will be obligated towards Law Enforcement Terrorism Prevention Activities (LETPA) Under 6 U.S.C. § 607, The LETPA allocation may be met by funding projects in any combination of the five National Priority Areas identified above and any other investments.

For additional information, you may review: 6 USC 607 (a) 2 here: [https://uscode.house.gov/view.xhtml?req=\(title:6%20section:607%20edition:prelim\)](https://uscode.house.gov/view.xhtml?req=(title:6%20section:607%20edition:prelim))

\$168,000, Nye County employs a unified, global IT system that supports the entire County. This project will immediately improve cyber security for the Nye County Sheriff's Office, Nye DEM and all entities they routinely communicate with electronically.

16. Sustainment Plan: Identify any continuing financial obligation created by the Project, and proposed funding solution.

The only continuing financial obligation would be in the event that we have to scale back this project. In that event we would seek additional funding through the FY23 HSGP.

17. Can this project funding request be reduced? Is it scalable? Please answer Yes or No, and explain below.
Yes. If absolutely necessary we could reduce the requested funding by \$40,000 for a total grant request of \$128,000. However, in order to scale back by this amount, we would be required to remove the Business Impact Assessment phase of the project. Removing the BIA would drastically reduce the overall effectiveness of the project and make it necessary to request increased funding amounts in future grant cycles.

18. Project Location: Provide the 5-digit zip code where the project will be executed. The project location could be distinct from the sub-recipient address.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

89060

19. Build or Sustain: Select "build" if this project focuses on starting a new capability or the intent of the project is to close a capability gap or "sustain" if the purpose of the project strictly maintains a core capability at its existing current level.

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Build

Sustain

20. Is this request deployable? All assets supported in part or entirely with FFY 2022 HSGP funding must be readily deployable and NIMS-typed when possible to support emergency or disaster operations per existing Emergency Management Assistance Compact (EMAC) under 6 U.S.C. § 609, and any other applicable provision of the Homeland Security Act of 2002, as amended. Is the core capability supported by this project deployable to other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

21. Shareable: Is the core capability supported by this project shareable with other jurisdictions? (Yes/No)

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

22. Does this project support a NIMS typed resource? If yes, continue to the next question.<p> To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)

Yes

No

23. Enter the name of the typed resources from the Resource Typing Library Tool. If not applicable, type in "not applicable" To search for a resource Please visit: <https://rtlt.preptoolkit.fema.gov/Public>

This question is for data collection for the Biannual Strategy Implementation Report (BSIR)
